HR-Structures The Company

Our head office and production facility are located in **Hesse, Germany**. As an owner-managed company with a state-of-the-art 80,000 m² factory, we implement projects worldwide and are constantly on the lookout for new challenges.

”

**Design.
Innovation.
Tradition.**

Our Pagodas

A classic and striking solution for events of all kind.

Pagodas from HR-Structures are characterised by their spacious design and compact dimensions. They offer endless scope for expansion and will not fail to impress with their distinctive appearance and unmistakable roof shape, creating a style highlight that doesn't compromise functionality.

Thanks to their lightweight construction and expansion possibilities, our Pagodas are the perfect addition to any event. Choose from a wide range of accessories, such as glass or solid walling, doors, flooring systems and more, to ensure a fully customised design and layout.

The unique shape of the Pagoda makes it a real eye-catcher and perfect as an impactful reception area, merchandising unit, catering/bar spaces and much more.

Features

- >> Available in sizes from 3.0 x 3.0 m to 20.0 x 20.0 m
- >> Available with side heights from 2.2 to 3.0 m
- >> Different configurations available
- >> Customised dimensions and equipment available on request

Our Party Tents

With spans of 3.0 to 10.0 m and a frame spacing of 3.0 m, our Party Tents are a quick and easy event space solution.

Party Tents from HR-Structures are the ideal solution for a small to medium sized event that requires fast set-up and dismantle times.

Distinguished by their lightweight qualities and easy assembly, our Party Tents are a reputable, affordable and reliable solution that is extremely popular with many tent rental companies. The adjustable spans and lengths provide a high degree of flexibility and individuality.

All our Party Tents are optionally and individually extendable due to the modular construction. This means that various components such as floor systems, solid walling options or extensions can be perfectly co-ordinated depending on your wishes and the occasion.

It is not only the distinctive look of the Party Tents that makes them special, but also their safety and cost-effectiveness. They are specially designed for quick assembly and dismantling and provide the highest statically tested stability. All HR-Structures Party Tents are manufactured at our in-house production facility in Germany according to the European standard EN 13782.

Features

- >> Self-supporting spans available up to 10.0 m
- >> Endlessly extendable in increments of 3.0 m
- >> Side heights available up to 2.4 m
- >> Customised dimensions and equipment available on request
- >> Roof design options available
- >> Wind load: 80 km/h (0.3 kN/m²)

Our Event Tents

With widths from 10.0 to 60.0 m and bay spacing of 5.0 m, our Event Tents are the perfect solution for your hire stock or venue.

Are you looking for an elegant, stylish and spacious Event Tent to extend your venue facilities or expand your hire stock with? Event Tents from HR-Structures deliver the perfect all-in-one solution for large events that is both modern and multifunctional.

The generously sized structures come with many different design options and the modular construction ensures easy expansion, creating incomparable Event Structure solutions in no time at all.

Our HR-Structures Event Tents are available as standard in widths from 10.0 to 60.0 m and side heights from 2.4 to 4.0 m, as well as unlimited lengths. Choose from a wide range of accessories and design possibilities for your perfectly tailored Event Tent.

Features

- The classic Event Tent coupled with the highest quality standards
- Self-supporting width spans available up to 60 m
- Endlessly extendable in 5.0 m increments
- Side heights available up to 4.0 m
- Customised dimensions and equipment available on request
- Wind load: 102 km/h (0.5 kN/m²)

Our Polygon Structures

Do you need more usable interior height? Then the Polygon is the ideal structure.

Polygon tents from HR-Structures offer an abundance of usable interior height ensuring the perfect larger space for the realisation of your projects and ideas. With self-supporting spans of up to 60.0 m, our Polygon Structures are endlessly expandable in modular dimensions.

We create space for top performance and our Polygon Structure is no exception! Due to the height these distinct structures are particularly popular for sporting events, providing the space and all year round cover for volleyball courts, swimming pools, tennis courts and many other facilities.

Polygons also offer a perfect solution for any temporary event space and the optional equipment, such as condensation protection or insulated side panels, ensures even more application scenarios are possible.

Features

- Particularly large interior heights
- Self-supporting spans available up to 60.0 m
- Endlessly extendable in 5.0 m increments
- Side heights available up to 5.0 m
- Customised dimensions and equipment available on request

Our Special Structures

Originality inspires creativity - shape your own Special Structure

At HR-Structures we know no limits. Bigger, higher, more innovative - we design and build space solutions entirely according to your ideas and conceptions. This is how truly unique products are created.

From the initial consultation and design to production and final assembly, our decades of experience in tent and building construction will turn your Special Structure ideas into a reality.

Partner with us for your Special Structure project and we will ensure you stand apart from the rest. The HR-Structures team is always at your disposal with our in-house engineers and experts in design technology.

Customised individual solutions are our daily business and we love nothing more than turning wishes into reality with passion and commitment.

Special Structure Options

- >> Bespoke roof designs
- >> Individual walling finishes
- >> Customised frames to suit your transportation methods
- >> Designed to meet regional building regulations
- >> Special non-standard materials can be used

Our Skyline Structures

Whether single-storey or multi-storey our Skyline series are an event highlight that will not fail to impress with their stunning, high-quality, facade system.

Skyline Structures from HR-Structures - the premium tent for exclusive occasions, events and spectator viewing.

Our Skyline system combines innovation and quality in one inspiring structure. Discover spacious room concepts with a modern, impressive design - completely adapted to your wishes and needs.

Skyline Structures will guarantee an exclusive ambience that can be further customised with numerous elements - the epitome of modern temporary architecture.

These include, for example, interior canopy constructions, high-quality staircases and railings, state-of-the-art door and window systems, pre-stressed facade systems, attica solutions and balcony constructions, ideal for use at spectator sporting events.

Our Skyline Structures ensure unforgettable events all over the world.

Features

- >> Designed aluminium profile to accommodate the high-quality Skyline facade systems, installed in front of the structure frame.
- >> Self-supporting spans available up to 40.0 m
- >> Endlessly extendable in increments of 5.0 m
- >> Side heights available up to 8.0 m
- >> Customised dimensions and equipment available on request
